About You

wpninjas.au

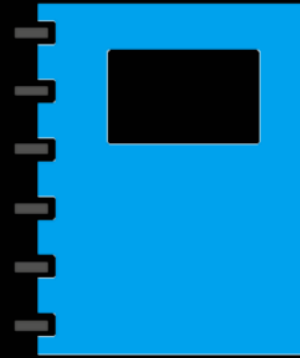

What is it?

wpninjas.au

Microsoft Intune Suite provides mission-critical advanced endpoint management and security capabilities into Microsoft Intune.

What is included?

Advanced
Analytics

Microsoft Intune Advanced Analytics provides comprehensive visibility of the end-user experience in your organization and optimizes it with data driven insights.

What is included?

Enterprise
App
Management

Microsoft Intune Enterprise App Management enables you to easily discover and deploy applications and keep them up to date from the Enterprise App Catalog.

What is included?

Endpoint
Privilege
Management

Microsoft Intune Endpoint Privilege Management (EPM) allows your organization's users to run as a standard user (without administrator rights) and complete tasks that require elevated privileges.

What is included?

wpninjas.au

Remote
Control

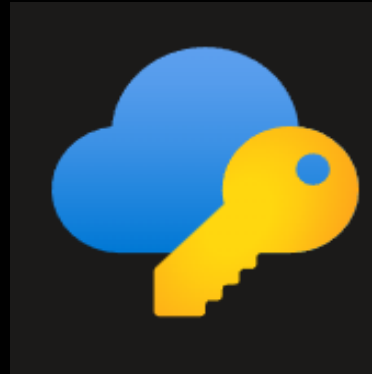

Remote Help is a cloud-based solution for secure help desk connections with role-based access controls. With the connection, your support staff can remote connect to the user's device.

What is included?

wpninjas.au

Cloud PKI

is a cloud-based service that simplifies and automates certificate lifecycle management for Intune-managed devices.

What is included?

Firmware over
the air update

Firmware Over-the-Air (FOTA) updates allow remotely updating the firmware of devices using a wireless connection, rather than requiring the devices to be physically connected to a computer or network.

What is included?

wpninjas.au

Tunnel for
MAM

When you use the Microsoft Tunnel VPN Gateway, you can extend Tunnel support by adding Tunnel for Mobile Application Management (MAM). Tunnel for MAM extends the Microsoft Tunnel VPN gateway to support devices that run Android or iOS, and that aren't enrolled with Microsoft Intune.

What is included?

Specialised
devices
management

Specialty device management with Microsoft Intune provides a range of management, configuration, and protection capabilities for specialized devices, such as AR/VR headsets, large smart-screen devices, and select conference room meeting devices.

Demo time

wpninjas.au

Advanced Analytics Demo

wpninjas.au

- Custom device scopes
- Anomalies
- Enhanced device timeline
- Battery health
- Device query

Enterprise App Management Demo

wpninjas.au

- Acquire apps / App catalog

EPM Demo

wpninjas.au

- Setup
- EpmTools PowerShell module
- Support Approval
- Child process behavior (Razer PE)

Remote Help Demo

wpninjas.au

- Setup
- Permissions
- Demo session

Cloud PKI Demo

wpninjas.au

- Create certificate servers

Roadmap

wpninjas.au

- **Fleet Query – Advanced Analytics**
- **Updates for Catalog Apps – Enterprise App Management**
- **MSI and Settings – Endpoint Privilege Management**
- **macOS Full Control – Remote Help**
- **SSL, Code Signing, S/MIME – Cloud PKI**

Extra Resources Tech Takeoff
