Windows vs macOS

Autopilot	ADE
ESP	Not really…
LAPS	LAPS
TPM	SecureEnclave
WHfB	PlatformSSO
BitLocker	FileVault
Registry Hive	Preference Lists
Windows Firewall	Sort of a Firewall…

Pre-requisites

Connect Apple Business with Intune

- MDM Push Certificate
- ADE Token
- VPP Token

Apple Business

- Onboard with Apple Configurator
- Let an Apple or Reseller do it for you

Implementing Config

PSSO during Setup Assistant

Turn On → Sign in M365 for MDM Enrolment → Device Configs Apply → Exit Setup Assistant → User must click on Notification → Sign in M365 and setup PSSO

Turn On → Sign in M365 for MDM Enrolment → Device Configs Apply → If PSSO configured, setup PSSO → Exit Setup Assistant → Open M365 App and finalised

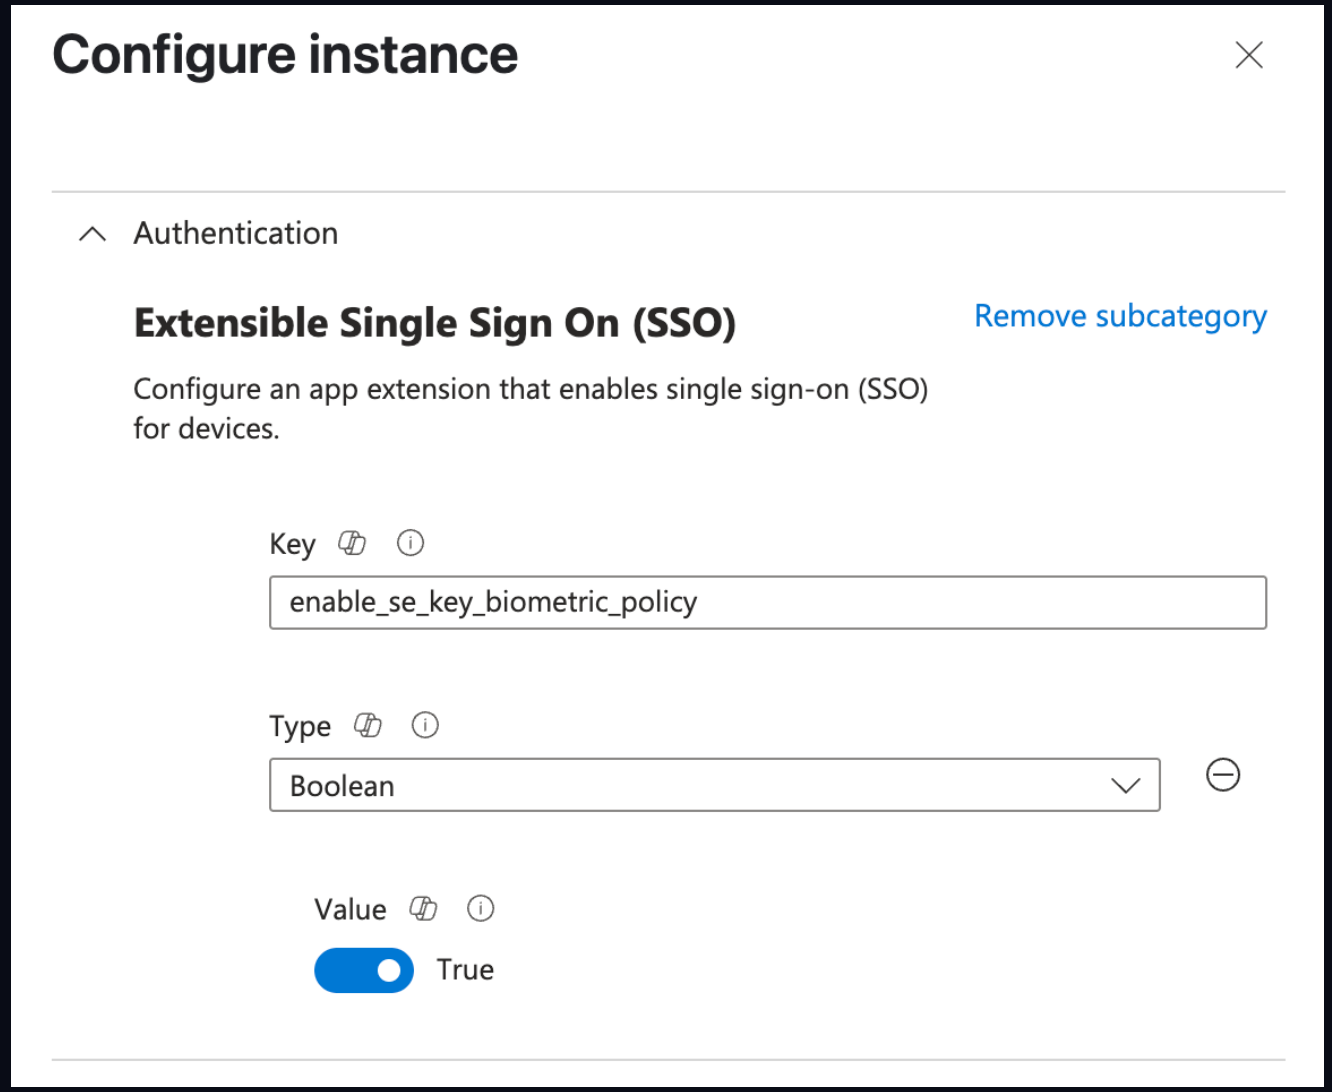

User Secure Enclave Key Biometrics

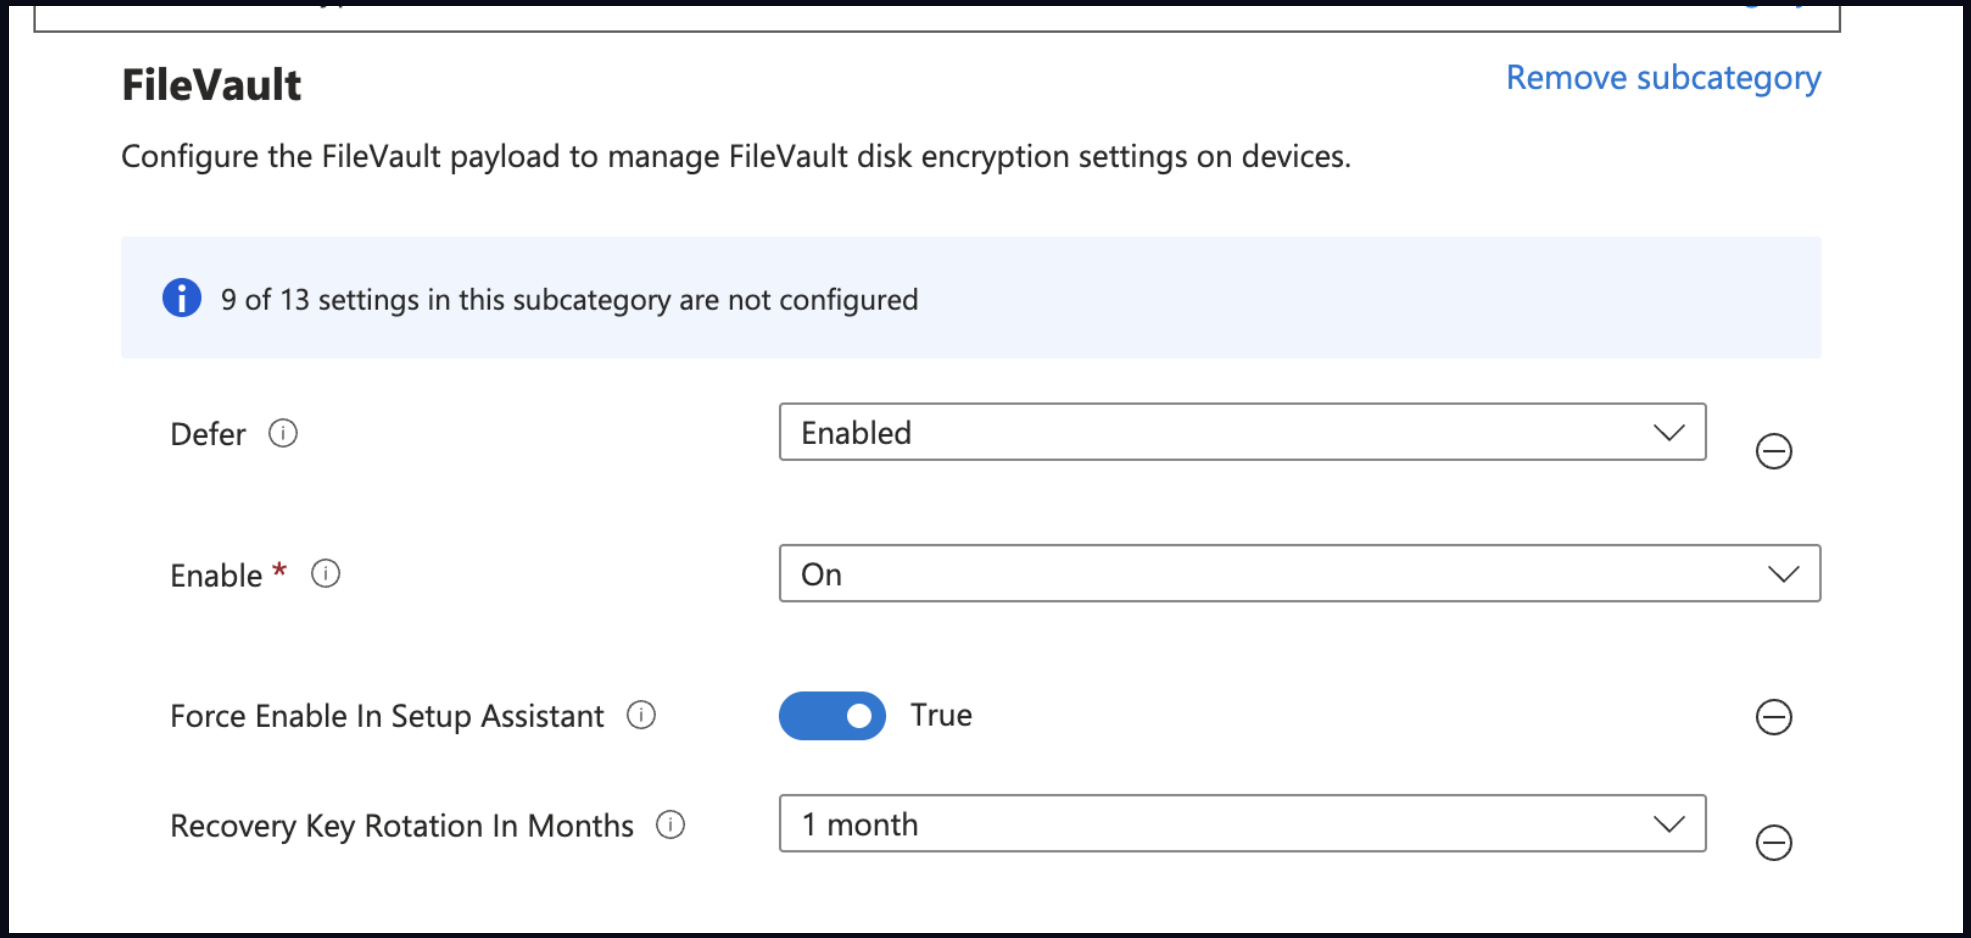

Enforce Touch ID authentication whenever User Secure Enclave Key is accessed

No password fallback

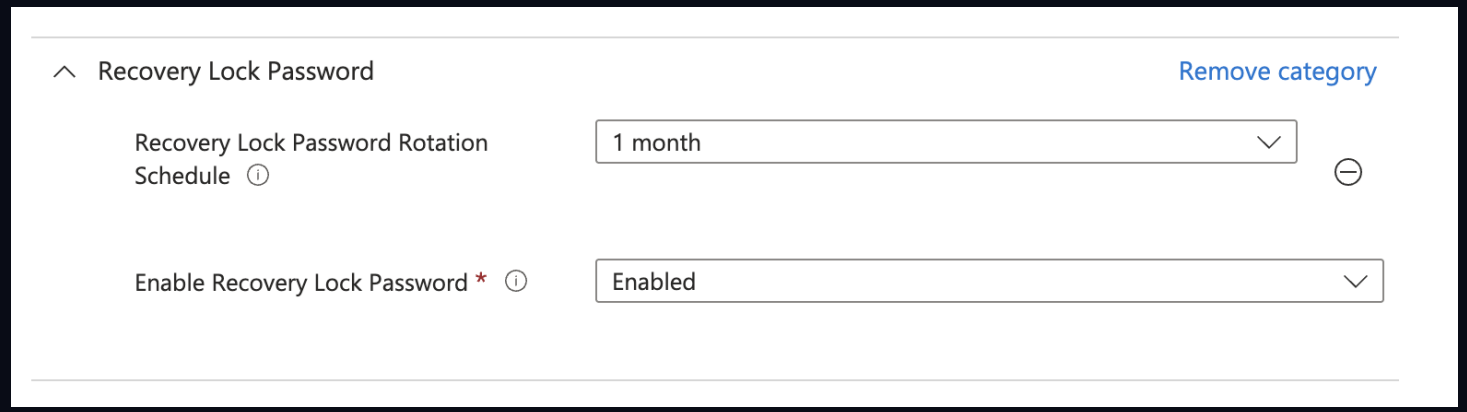

Extra prompts during PSSO registration, Enablement afterwards leads into re-registration process (admin-driven)

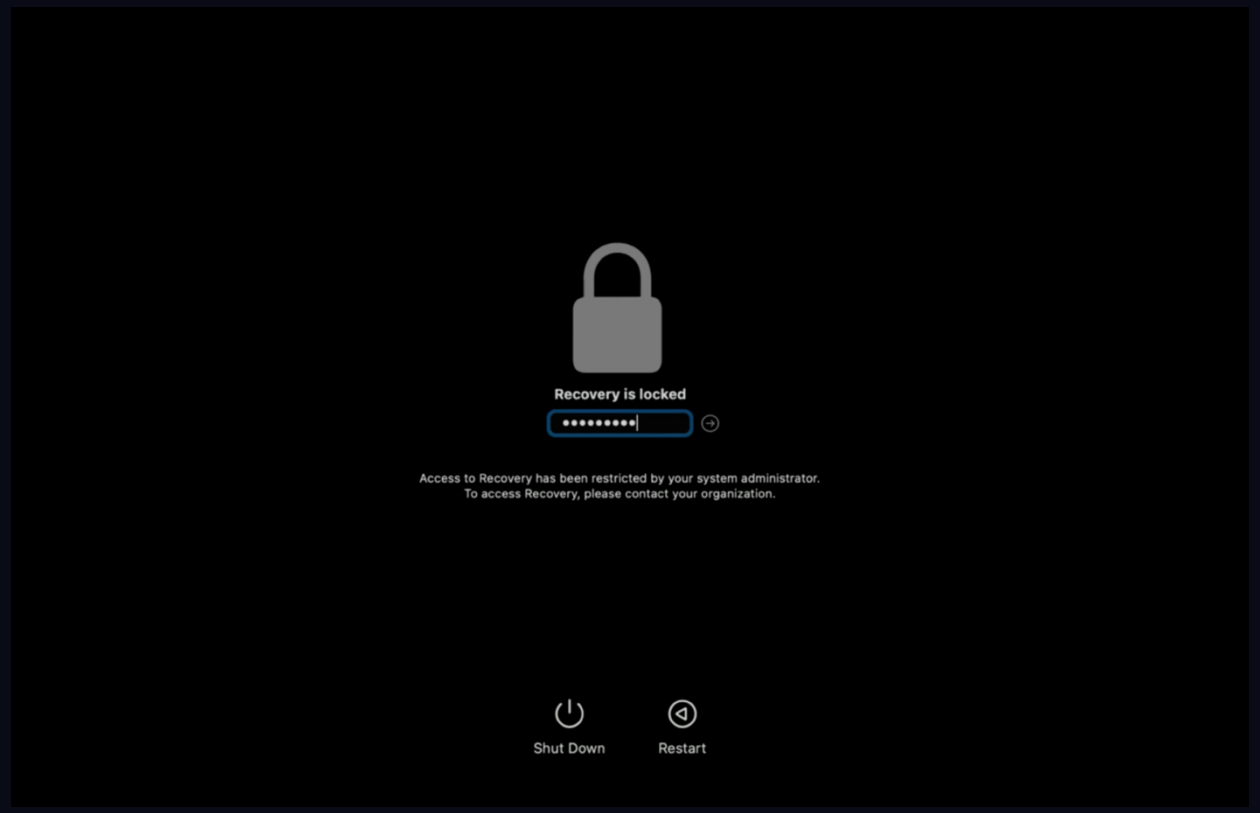

FileVault

FileVault
Remove subcategory
Configure the FileVault payload to manage FileVault disk encryption settings on devices.
9 of 13 settings in this subcategory are not configured
Defer

Recovery Key Rotation In Months
1 month

Recovery Lock

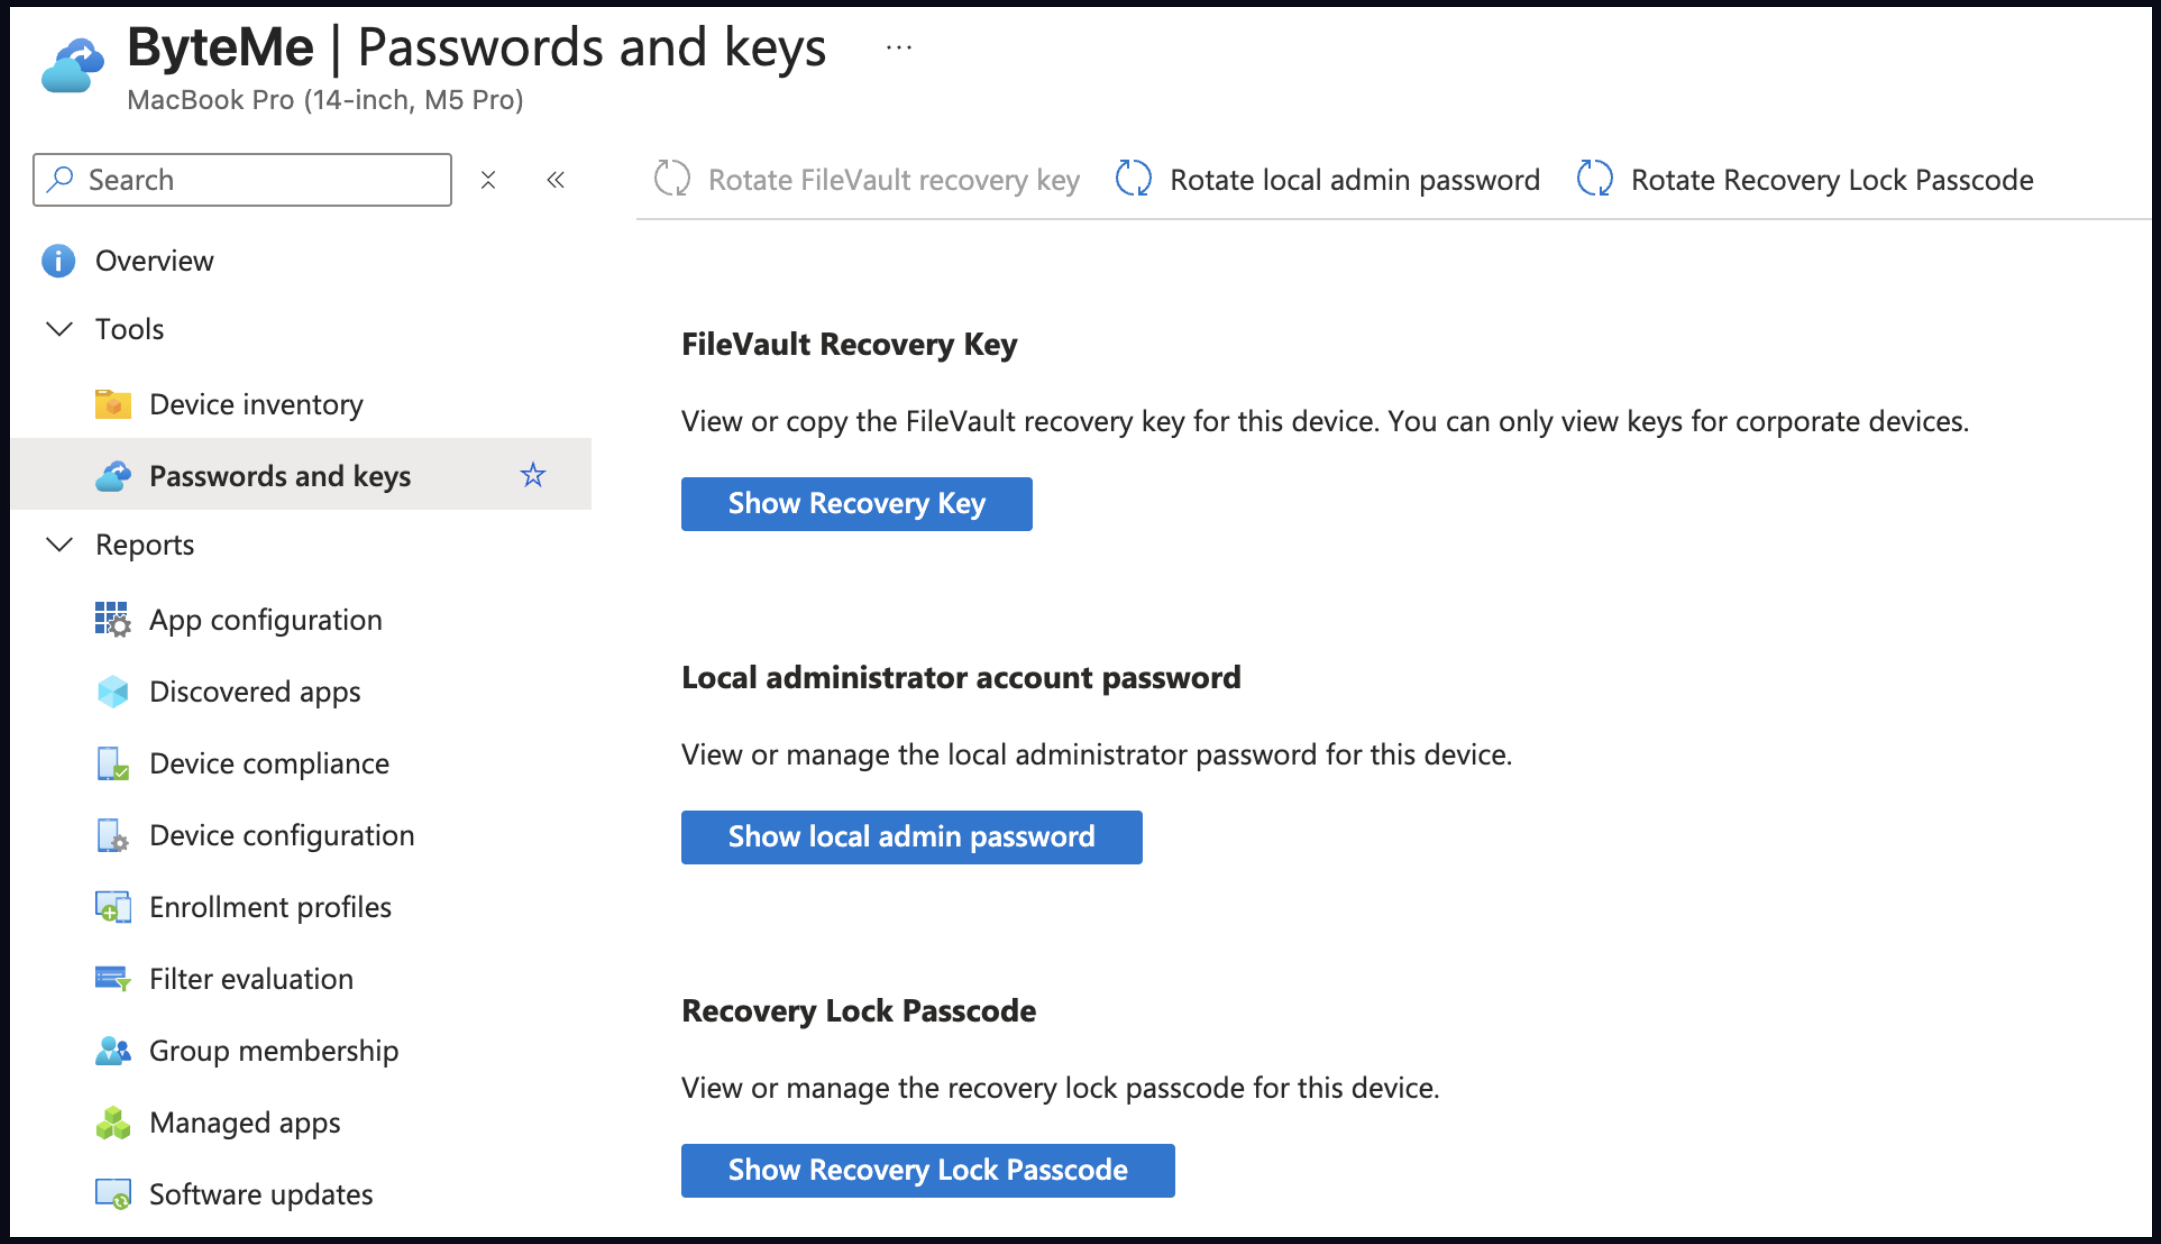

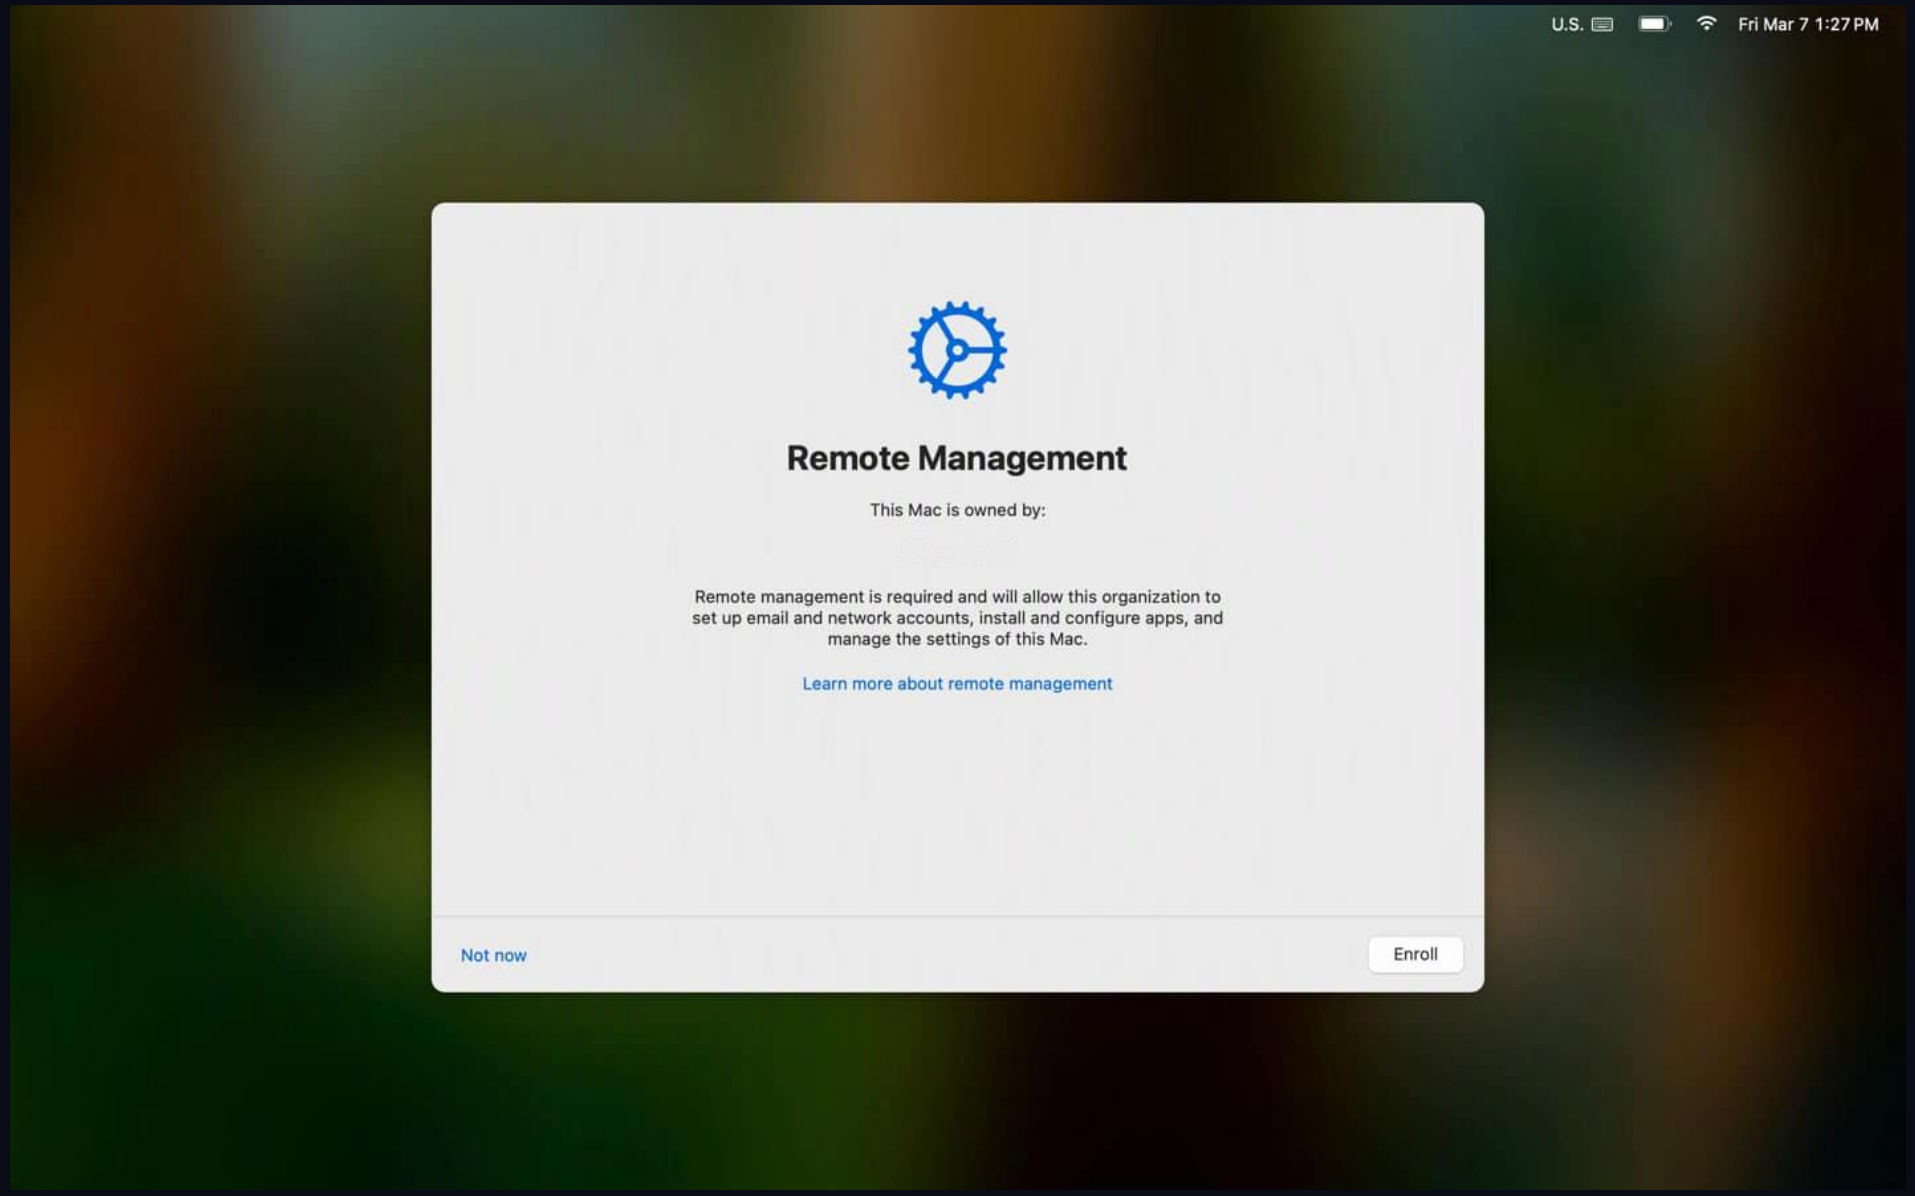

Apple Silicon

Protects the macOS recovery environment by requiring a password before a user can access Recovery Mode, Startup Options, reinstall macOS, or wipe the device.

Where to find them?

NEW DDM AREAS

available for management

Privacy Consent

Permission	PPPC KEY	MACOS 27 STATUS	CONFIGURE WITH
Accessibility^	Accessibility	Depreciated	DDM
Camera	Camera	Depreciated	DDM – Allow PPPC - Deny
Microphone	Microphone	Depreciated	DDM – Allow PPPC - Deny
Bluetooth^	BluetoothAlways	Depreciated	DDM
Speech Recognition	SpeechRecognition	Depreciated (no DDM Key)	PPPC
Dictation	-	New	DDM
Local Network	-	New	DDM
Location	-	New	DDM

^ new user consent

Privacy Consent Demo

Binary Allow and Deny

Deny always wins

/bin/, /Library/Apple/, /sbin/, /System/, /usr/bin/, /usr/libexec/ and /usr/sbin/ **always run** (except /System/Applications/)

Deny – One identifier is enough

Development or ad-hoc signed binary cannot be allowed

Allow – CDHash or **TeamID** must be used

'Trusted Installer' exists when app installed as managed

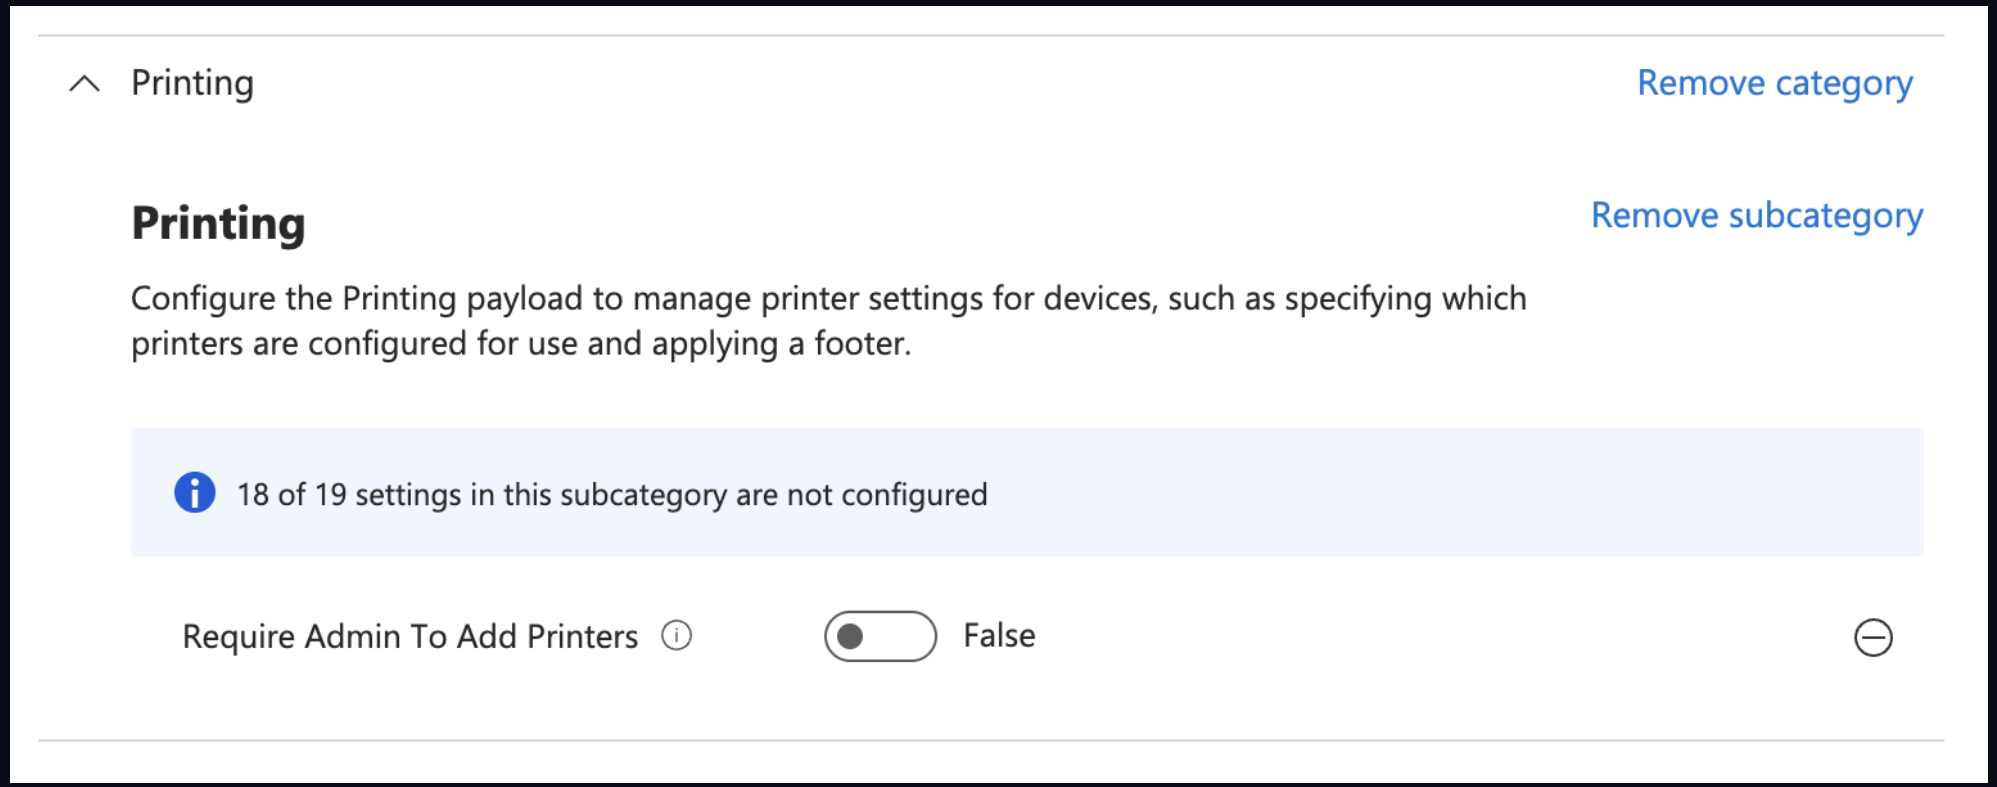

Defining an Allowlist

Team ID	Covers
APPLE	Apple's own apps in /Applications and /System/Application
UBF8T346G9	All Microsoft Products

Building your own PKG Demo

macOS Apps

Managed Apps

Flat PKGs installed using MDM.

Simplified app upload.

Intune app wrapping tool is no longer needed.

Takes advantage of DDM improvements.

Purchased and custom apps are also supported.

DMG Apps

Most common Mac apps.

Easy to create with macOS Disk Utility.

Intune supports DMGs containing one or more apps (not .zip).

Deployed using Intune agent.

Expanded up to 8 GB per app.

PKG Apps

Great for deploying unsigned, component, or custom (non-flat) packages.

Uses built-in installer command.

Pre and post install scripts.

Deployed using Intune agent.

Expanded up to 8 GB per app.

Thank You, Ninjas!
